注意

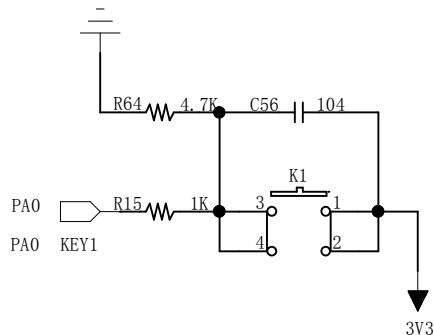

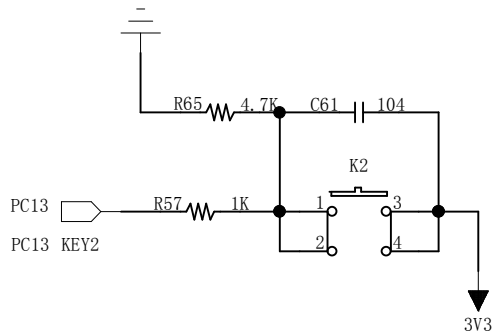

- 1、ESP8266 定位于物联网，主要用于传输小数据量比如一些温湿度信息，或者其他一些传感器的开关量
不能用于传输图像音视频等大数据量的文件
- 2、我们测试每次传输200字节非常稳定，不丢包
速度也很快，对于传输开关量信息绰绰有余
- 3、测试距离是10米半径内，穿一扇墙
